COMPUTER SCIENCE STUDENT | WEB DEVELOPER | DSA-ORIENTED LEARNER

Motivated B.Sc. (Hons.) Computer Science student in the second year, seeking opportunities as a Web Developer or Frontend Developer, with growing exposure to backend development and AI/ML. Strong foundation in problem solving, data structures, and core computer science concepts, with hands-on experience building real-world, student-focused web applications. Passionate about clean UI, logical thinking, and continuous learning in emerging technologies.

KEY COMPETENCIES

Full Stack Web Development	Object-Oriented Programming	Responsive UI Design
Problem Solving & Logical Thinking	Database Fundamentals	Self-directed Learning
Data Structures and Algorithms	Backend Development	
	Automation	

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, C, C++, Python, JAVA, Latex
Frameworks & Libraries: Bootstrap, Tailwind, React.js, Node.js, Express.js, Three.js
Web Technologies: DOM Manipulation, Responsive Web Design, Client-side Form Validation
Programming Concepts: Data Structures, Object-Oriented Programming, Conditional Logic, Design and Analysis of Algorithms
Tools & Platforms: Git, GitHub, JSON, Browser, Windsurf, Codex, Claude
LocalStorage, vercel, Supabase

PROJECT EXPERIENCE

Behaviour Prediction Engine (Full-Stack Web Application)

HTML, CSS, JavaScript, Python (FastAPI), MongoDB

Designed and developed a full-stack web application that predicts user behavior patterns based on input data and activity history. Implemented a responsive frontend interface integrated with a FastAPI backend for real-time predictions. Built APIs to process user inputs, apply prediction logic, and return insights dynamically. Integrated MongoDB for storing user data, prediction results, and history tracking. Developed interactive dashboards to visualize behavior trends and improve user decision-making, simulating a real-world AI-driven system.

EDUCATION & CERTIFICATIONS

B.Sc. (Honours) in Computer Science

Dayalbagh Educational Institute
Focus Areas: Data Structures & Algorithms, Web Development, AI/ML (Aspirant)

CERTIFICATIONS & LEARNING

Offline training in C++ programming and Object-Oriented Concepts
Offline course in Data Structures and Algorithms
Offline course in MERN stack
Continuous self-learning in backend development and AI/ML fundamentals
